

## The Transportation Network

**Market Access** - Location is perhaps one of Portage County's greatest assets. At the center of the Northeast Ohio transportation network, the county is located 40 miles southeast of Cleveland and approximately 20 miles east of Akron.

Portage County truly enjoys the best of both worlds. The county retains its rural atmosphere, with several long-established small communities interspersed between the major cities. Portage's exceptional transportation system provides a quick link to the resources and conveniences of northeast Ohio, the nation and the world.

### Highways/Interstates

Routes 71, 76, 77, 80, 90, 271, and 480 are easily reached from anywhere in the county. Ohio Turnpike (I-80) exits 13 and 13a are in Portage County.

## Transportation Services

**Rail and Trucking Services** - CSX, Norfolk Southern, Wheeling and Lake Erie Railway and 150 plus trucking companies in the region provide Rail and trucking services.

**Air Services** - Air Services are provided by Cleveland Hopkins International, Akron/Canton and Youngstown Airports, all within one-hour driving time. Additionally, smaller aircraft can be accommodated at the Portage County and Kent State University Airports.

**Shipping** - Four lake ports serve the area including the port of Cleveland within a one-hour drive of Portage County.
